## Winter Lawn Tips for Florida Lawns

**Overseed:** Consider overseeding with winter friendly grasses. The cold weather grass will keep your lawn healthy during the winter, but die off in time for summer when it'll be replaced by your warm weather grass again!

**Mow Your Lawn:** During the winter months, you should continue to mow your lawn regularly while leaving clippings on the grass. The clippings act as a natural fertilizer and help keep weeds at bay. You should also reduce the blade height of your mower when cutting in order to prevent scalping and other damage to the lawn from cold weather conditions.

**Water less frequently:** Set your irrigation system to water once a week during the winter. Overwatering can make your lawn more vulnerable to pests and fungal diseases.

A special Thank You to  
Thom Bingham and family  
for the front entrance  
lighting!
