Fall Tips for Florida Lawns

-  Increase mower height: Raise your mower blades to 2.5/3 inches to encourage deeper root growth.
-  Water deep and less often: As temperatures cool, your lawn needs less water. Adjust your watering schedule to water deeply but less frequently.
-  Fertilize in the fall: Apply fertilizer in October or November to provide nutrients for the upcoming spring.
-  Apply pre-emergent: use a pre-emergent herbicide in the fall to prevent winter weeds from germinating.
-  Watch for pests: Scout for any visible pests and address them early to prevent them from becoming a bigger problem.

ARB Approval is required prior to any exterior changes to the home/property. You may submit and ARB request at www.ElimServices.com under the "ARB Form" tab.
