Essential Winter Lawn Tips for Florida Lawns

Watering Pre-Freeze: Hydrate the lawn 24–48 hours before a freeze to help soil retain heat, but avoid watering during freezing temperatures.

Mowing Height: Raise mower blades to the highest setting (3–4 inches) to protect the crown of the grass.

Irrigation Reduction: Reduce watering frequency to every 14–21 days, or when the lawn shows signs of drought stress.

Cover Sensitive Plants: Use frost blankets or breathable fabrics (not plastic) to cover delicate plants, securing them to the ground.

Protect Potted Plants: Move potted plants indoors or to sheltered areas.

Pest/Disease Control: Be aware that Centipede and St. Augustine grass can suffer from large patch fungus in the fall; minimize excess nitrogen.

Per your community's governing documents, ARB approval is required prior to making any exterior changes to the home/property. A copy of your community's governing documents can be found at <https://www.elimservices.com/communities/richmond-place-owners-association/>. You may submit an ARB request at <https://www.elimservices.com/arb-form/>.

Key Winter Home Care Tasks for Florida Homeowners

- **HVAC & Air Quality:** Change air filters, check for mold, and consider a dehumidifier to keep indoor humidity levels between 35% and 50%.
- **Seal the Home:** Inspect and fix weather stripping on doors and windows to keep out pests seeking warmth.
- **Plumbing Protection:** Insulate exposed pipes and outdoor faucets to prevent freezing during unexpected, cold Florida nights.
- **Landscaping & Exterior:** Trim trees and branches away from the roof, clean gutters, and adjust irrigation systems for reduced, cooler-weather water needs.
- **Pool Maintenance:** Maintain proper chemical balance to prevent algae growth and keep the pump running regularly.
- **Pest Control:** Schedule a professional inspection, as rodents and insects often move indoors during cooler weather.
